# About Us

## KUBER INTERNATIONAL TRADING LLC.

*Our company was born from a passion to help people build, fix, improve and create easy and effective Advertising and Marketing campaign. Kuber International was an ambition of our Director, Mr. J.P Kothari to create a company with morale to stay humble and care about all customer needs to its core. We proudly distribute our products because we manage to keep our customers need above us and still manage it at a reasonable price.*

*Kuber International Trading is an Advertising and Signage material distributor based in UAE. Our Media products is what gives us edge over our competition. We provide building material as an additional asset to our ever growing product list. Being one of the biggest distributors in this region, Our headquarters is in Dubai, the heart of UAE. We operate and deliver our products to the extreme corners of UAE. We as a company are always looking for opportunities and expansion of our product list. We are honored with a vast customer list and an equally enthusiastic distributors list. Our connections and contacts around the world help us get the best products to you.*

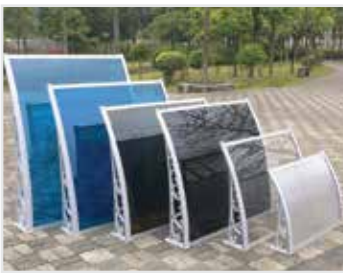

*Since 2013 we have been fulfilling our promise to serve the best to our customers. This 8 years of service has given us the experience to serve, suggest and recommend the best solutions for all your product problems. Our expert representatives are the biggest asset to the company. The representatives have been trained and understand the needs of a customer, which helps them suggest products accordingly. We believe in maintaining long term and healthy relationship with our esteemed customers*

## Our Vision

*To reach every customer with the right product at the right price. Working towards a 24/7 365 days customer services. Having recognized the need for each product in each domain, converting the feedback into learning has been our vital step forward. Manufacturing in turn becomes a process of constant learning*

## POLYCARBONATE SHEET

*Kuber's polycarbonate sheets are high performance engineering thermoplastic sheets characterized by high clarity heat and flame resistance. They have dimensional stability with exceptionally high impact strength over a wide temperature range, and durable for outdoor application because of the UV layers on both sides. They also have impact strength at low temperatures, chemical resistance and are dimensionally stable. They will resist cracking and splitting and are therefore weather resistant.*

## ACRYLIC SHEET

*Kuber International provides premium quality cast acrylic sheets, which, as the name suggests, is produced in casts or moulds with acrylic raw materials and chemicals (MMA and catalysts). The mould is made from 2 panes of clear float glass and silicone edging to create an air gap based on the thickness to be produced.*

## DIGITAL PRINTING MEDIA (OUTDOOR & INDOOR)

All Color

## ALUMINIUM COMPOSITE PANEL (ACP)

*Aluminium composite panel is popularly known as ACP. It is made up of aluminium composite material (ACM), which contains two thinly coated aluminium sheets. Being comprised of two distinct materials that is metals and non-metal, as aluminium is a metal and polyethylene plastic is a nonmetal, it overcomes the limitations and the drawbacks of the original material.*

*No material is as flexible as the ACP Sheets. Moreover, it is a modern age material that comes up with lots of practical and technical advantages over traditional materials.*

## SHEET AND BOARDS

*PVC Forex Sheet is chemically foamed, rigid, light weight extruded sheet with fine & homogenous closed cell structure having a smooth matt surface finish on both sides.*

*FOREX stands for fine, white rigid foamboards made of PVC. Our product range offers a wide choice of light, high-quality sheet materials for indoor and outdoor use in a wide-ranging portfolio.*

*Paper Foam Board - A very strong, rigid and easy to cut material. Used for mounting photographic films as a backing and supporting frame.*

*Corrugated Sheet is an extruded polystyrene foam board bonded between two sheets of high-impact polystyrene or white card paper. It is also flatness, light-weight, rigid and durable, water proof, moisture proof, good heat preservation, sound insulation and so on. The boards have PS surface, paper surface, adhesive release paper. They can be cut with a knife, and can be filmed or printed colorfully*

Application Tape  
 Double Side Red Tape (Somi Tape)

## BANNER & FLEX

**Frontlit Banner Matt**  
 Frontlit material may be used for any size indoor or outdoor banner, including pole banners. Our Frontlit Banner is a reinforced laminated banner material manufactured with a polyester scrim. This product is manufactured with a 9x9 polyester weave support structure laminated on both sides with a bright white PVC surface.

## **Black Back Banner**

*Black Back Banner is a super light weight yet strong substrate compatible with most wide format digital printers. This tear resistant film can be used as a front-lit banner and will withstand all types of outdoor environments. Its black back is ideal to keep light from shining through to the other side. This product has a "One Pass Coating" for UV curable printers.*

## **Flex**

*Flex banner is used when you have lights pointing in the back of the banner. It is white opaque substrate with 510-610 gsm thickness. These banners have high transmittance. They are specially coated for digital printing. They can be used outdoor and indoor with ease as they are weather resistant and water proof. More clear and visible image with back-light due to lower translucency. Its compatible with most solvent printers.*
